

Call for applications for the Autonomous Tutorials for the winter semester 2022/2023

The AStA Marburg offers again eight autonomous tutorials in the **winter semester 2022/23**. We are looking for interested students of the Philipps-Universität Marburg from all departments who would like to offer an autonomous tutorial on a topic of their own choice **starting October 15, 2022**. The autonomous tutorials offer students the opportunity to explore topics together from different perspectives, interdisciplinary and critically, without being bound to university constraints such as exams.

Each tutorial will be compensated with **360 € per month (30 hours; 12,00 €/hour)**. The positions are limited in time **until March 15, 2023**.

The application consists of the following parts:

- **Completed form with information about applicant** (applicant form, which only asks for some core information)
- **letter of application with question** (max. 2 pages, in which the self-formulated question and the concept for the semester are presented, with which the tutorial will be explored and which should run as a red thread through the sessions)
- **announcement text for the tutorial** (approx. 250 words, which advertises and describes the autonomous tutorial)
- **certificate of study** (current certificate of enrollment)
- **preliminary session plan for the semester**, from which the didactic concept as well as the learning objectives are recognizable (and which will be presented in a short presentation if invited to the selection interview)

The following selection criteria apply:

- Autonomous tutorials create a non-curricular teaching offer. Therefore, undergraduate teaching may not be offered

- The tutorial must be interdisciplinary and should be designed and organized to appeal to students from all disciplines
- The tutorial should pursue an interdisciplinary theme and/or innovative teaching concept
- The tutorial should take a critical look at their respective teaching and research disciplines and/or critically reflect the social context of the sciences
- The tutorial should meet common scientific standards

Enrolled students of the Philipps-Universität Marburg from all study programs can apply. Applicant teams of max. two persons are possible. Only one application per semester is allowed. Doctoral students are only eligible if they do not have a teaching position at the Philipps-Universität Marburg. During the selection process, care is taken to ensure that the tutorials are distributed among as many departments as possible.

Applicants who meet the selection criteria will be invited to a selection interview of approximately 30 minutes with the committee. Applicants will be informed about the exact time of the selection interview after sending in the complete application, but they will usually take place in the second week after the application deadline. Confirmation of the date of the selection interview is obligatory. In addition, the AStA Marburg organizes an information event at the beginning of the semester, where the selected tutorials are to be presented by the tutors. This event is scheduled for the first week of lectures of the new semester.

The AStA Marburg guarantees the professional equality of WLINTA*. These applicants will be given preference in case of equivalent aptitude and qualification. The AStA Marburg is particularly committed to the equality of severely disabled and non-disabled persons and therefore welcomes applications from severely disabled persons. In accordance with SGB IX, they will be given preferential consideration in cases of equal suitability, ability and professional performance.

Meaningful and complete applications should be submitted by e-mail as a PDF to dorotheao@asta-marburg.de or auton-tutorienkoord@asta-marburg.de by Thursday, September 15, 2022 at the latest. Unfortunately, incomplete applications and applications received after the deadline cannot be considered.

If you have any questions, Dorothea Orth from the coordination office for the Autonomous Tutorials (dorotheao@asta-marburg.de or auton-tutorienkoord@asta-marburg.de) will be happy to help you by e-mail and, by arrangement, by phone or at the AStA Marburg on site.
